Off-Road Restoration Act

CONTACT: Mason Herron February 27, 2017

mason.herron@asm.ca.gov

SACRAMENTO –Assemblyman Randy Voepel announced that he has introduced the Off-Road Restoration Act, which will restore funding critical funding to pay for law enforcement, safety, and environmental restoration on land used for off-road recreation.

"Several years ago, the Legislature voted to raid \$10 million from the OHV trust fund every year, and put that money into the general fund," said Voepel. "As a result, there has been less money for education, trail construction, and other services for off-roaders. This bill would end that raid and ensure the funds stay in the trust fund where they belong."

"Not only does the Off-Road Restoration Act ensure our off-road lands are maintained and protected, but this legislation will also make sure that tax dollars collected from off-road recreation are spent where they belong – off road."

So far, AB 382 has accumulated more than fifteen Co-Authors in the Senate and Assembly.

To view the legislation as introduced, [please click here](#).

[Cal4wheel convention Feb 19th 2017](#)

The convention was a success. 41 clubs were in attendance. The budget is in the black. The Jeep raffle raised \$40,000. The guy who won it showed up at convention, bought one ticket and won the Jeep. He has chosen to not keep the Jeep he is selling it on e-bay and donating a portion of the proceeds to Cal4Wheel. The current bid is \$36,000. New raffle tickets are now for sale. Next year convention will be in Riverside. Steve remained president for a third term, all three VPs are new. Mike (president) won four new tires as well.

11 Jeeps met near the Lenwood Rd. outlet malls. The weather was cloudy and cool with 18 mph wind. It was a dark night with no moon or stars, but very clear and no rain.

The first part of the run was 4 miles of soft sandy wash. Some sliding around in the soft sections of the wash made for lots of fun in 4 wheel high.

After a short drive on Stoddard Wells Rd. we arrived at the Devils Loop gate keeper: a large pile of rocks that challenges the readiness of the vehicles and drivers entering the trail. A few needed a little extra throttle, but everyone made it through without much trouble. We continued up a rocky hill, down a rocky canyon and through a rocky sandy wash.

After a few more rocky sections and some rocky drop-offs. We climbed a steep rocky hill that put the whole group on a high spot overlooking the I-15 Fwy. a mile or so away. It was awesome to see the line of off road lights. I was wondering what the people on the freeway were thinking when they saw 50,000 lumens of light in the hills.

At this point we looped back through the same rocky sections we just finished. When we got near the gate keeper we turned into a side canyon. This canyon took us toward the end of the Devils Loop trail with some fun side loops along the way. In the dark we missed the turn for a fun canyon. To get turned around, we took a short detour loop that included some trail blazing.

The side canyon loop includes a tight squeeze with a 2 foot ledge to climb at the start. The last part of the side canyon is a steep hill climb with a blind top that drops off to the right.

After the last rocky section we returned to the sandy wash and headed back to the meet location. Overall a fun night run for all in the Stoddard Valley OHV hills..

Cowbells

The cow bell rules are: Cow bells are awarded from air down to air up. If you get stuck and are unable to move under your own power and need the help of a winch or you get strapped from one of your fellow jeepers then you have earned the privilege of hanging the cow bell from your front bumper. You must leave the cow bell on the front of your rig until another Dirt Devil gets stuck. Then you proudly hand it over. While on the trail, not on the highway to the trail.
